What product has recently become a hit on Tiktok and won the hearts of many consumers? That would be the multi-colored Slug fidget toy.

It is a colorful, novel and interesting product that appeals not only to children but also to adults all over the world. In the following context, I am going to introduce you to this popular product.

Although they have similar appearances, the materials have 2 types, one is PP, and the other is TPR+flour. Thanks to the different materials, this caterpillar fidget toy has more ways to have fun.

PP is safe and non-toxic material. PP slug allows you to manipulate each section of the slug's body as you wish, because it is very flexible. You can manipulate and pull back its body as much as you want. When you drag it, it looks like it really moves.

Apart from the ordinary model, there is also slug with lights. The glowing slugs add another kind of fun.

Many people like to release stress by pressing and squeezing objects. Then the TPR+flour slug will be a good selection, as its special material, you can press, stretch and knead it as you like without breaking. And the products made of this material have different feel, and the touch when pressing it is also very peculiar and attractive.

It has many sizes, whether it's big or whether it's small. And it has lots and lots of different color selections and the colors are combined, more possibilities are produced.

Besides being a stand-alone toy, there are many other derivative products on the market. For example, slug keychains, they have equal functions and which are more convenient to carry. As key chains, you can hang keys, which are more practical.

If you like decompressing toys, would you like to purchase this product? [Contact us](#) for quotes and more information.
